

FASTERHOLT

FASTERHOLT

FM 2500

Fasterholt Maskinfabrik is the world's leading manufacturer of self-moving irrigation machines.

Straight out and in soft curves

One of the great advantages with self-moving irrigation machines from Fasterholt Maskinfabrik is, that they cannot only irrigate in straight tracks, but also in soft curves.

Reliable gearbox

Note the reliable 6-speed MF 35 gearbox on which the FM 2500 machine is built.

Speed control

The by-pass valve with built-in filter controls the speed. This machine is equipped with a stop for low pressure. Can also be delivered with high pressure.

Nelson SR 150 cannon

The FM 2500, like all other irrigation machines from Fasterholt Maskinfabrik, equipped with the very reliable Nelson SR 150 cannon. Here you can also see the solar cell for charging the battery.
