

FASTERHOLT

# FASTERHOLT

## FM 5500H

The machine shown is fitted with additional equipment.

**Fasterholt Maskinfabrik is the world's leading manufacturer of self-moving irrigation machines.**

### Straight out and in soft curves

One of the great advantages with self-moving irrigation machines from Fasterholt Maskinfabrik is, that they cannot only irrigate in straight tracks, but also in soft curves.

### Double springs and rotating nose wheel

The FM 5500 is equipped with a draw bar with double springs and swiveling nose wheel, which follows the hose correctly.

### Hydraulic pull

The hydraulic pull for winding up the hose ensures that it is always optimally positioned.

### Only three 90° bends

This machine is equipped with an overpressure stop (can be equipped with underpressure). Also visible is the valve and electric motor for by-pass for speed regulation. Note that the water must only pass through three 90° bends before it comes out of the cannon.

### Technical data for FM 5500H:

Size of hose:	max 1000 m/125 mm
Total length:	10,60 m
Length without pull:	7.75 m
Height:	4.40 m
Total weight with water:	17,460 kg
Total weight without water:	8,330 kg
Wheel gauge: middle-middle:	2.00 / 2.25 m
Total width: ext. rear wheel:	2.60 m
ext. front wheel:	2.45 m
Size of wheels rear wheel:	600/65-28
front wheel:	16.0/70-20
