1. The by-pass valve with built-in filter controls the speed. This machine is also equipped with a stop for negative pressure.
2. The computer cabinet, which provides protection from the elements, is equipped with the Nortoft Konstant Regn 6 with pre-and post-irrigation and speed control.
3. Note the reliable 6-leveraged MF 35 gearbox and the solid rear axle, on which FM2500 machine is built.
4. FM 2500 is like all the other irrigators from Fasterholt Maskinfabrik equipped with the highly reliable and cost-less Nelson SR 150 gun. Here the gun is fitted with solar to charge the battery (optional).
5. Here are the two galvanized control levers for belt tension and also the brake lever on the hose drum. Please note the front axle, built up with parts from MF 33.

**FM 2500** is patterned after the Fasterholt machines well-known and reliable principles. This means among other things that:

- ◆ The part-power turbine pulls the oil pump, that by the oil-engine draws directly on the gear shaft of the tractor part
- ◆ The Konstant Regn-computer ensures constant forward speed, pre-and post-irrigation, monitoring, and also calculate the driving time and how many meters of hose that is laid out
- ◆ Over- and negative-pressure switch can be supplied upon request.

**Technical data for FM 2500:**

Size of hose:	max 500/100 mm – max 550/110 mm
Total length:	810 cm
Length without pull:	475 cm
Height:	365 cm
Total weight w. water:	5.500 kg
Wheel gauge:	mid-mid: 162 cm cm
Size of wheels:	rear wheel: 11.2"x28"x8 PR front wheel: 900/16"/6 PR
