1. Here you see FM 4550/4550H prepared for hydraulic brakes (optional). The gear selector and the handlebar for rotation and propulsion are located on the right hand side.
 2. To ensure optimum protection against wind and weather, computer and battery are fitted in a separate junction box. The machine is equipped as standard with Nortoft Program Regn 10-12 with zone irrigation, pre-and post-irrigation as well as setting of speed, clock, and mm of precipitation.
 3. Here is the solar cell for charging the battery. There is also a charger included as standard equipment. This machine is equipped with 2 solar cells, as it is also fitted with Tele-Rain (optional) and therefore requires an additional solar cell.
 4. The machine is equipped with the powerful and incredibly durable Nelson SR 150 gun with slow reverse, providing a smooth and quiet operation with minimum wear and tear, which means that the gun has a long life.
 5. Fasterholt's own part-power turbine is fitted with double pump (standard equipment). It provides a great variety of speed settings, and the stability of oil supply to the engine oil provides safe and easy propulsion of the machine.
 6. The FM 4550 is equipped with belt drive as standard. Here you can see the reliable piston pump for the H models.
- *) On the front page you can see how the large side screen is opened for easy maintenance.

Technical data for FM 4550/4550H:

Size of hose:	max 675/100 mm – max 550/110 mm
Total length:	830 cm
Length without pull:	600 cm
Height:	365 cm
Total weight w. water:	8,096/8,256 kg.
Wheel gauge:	mid-mid: 180/200 cm
Size of wheels:	rear wheel: 12.4"x36"x10 PR front wheel: 13.0"/75x16"/10 PR
