The picture shows the solid and galvanized chassis as well as the galvanized gun wagon and powerful hose reel.

Here you can see the powerful gearbox with integrated turbine. By default, the machine is equipped with stops for either high or low pressure. To the left of the picture is the Nortoft computer Program-Rain 10-12

The irrigation machine is equipped with hydraulic support legs and hydraulic gun wagon lift. Behind the screen sits the powerful cross-groove shaft for the hose guide, which ensures proper winding of the hose.

Here you can see the strong feature that is available with either a hitch eye or a fork pull. Furthermore, the hydraulic support leg is seen on the front drag, which is also standard equipment and the control valve for the various hydraulic functions, which are hydraulic turn of drum, hydraulic support legs and gun wagon lift.

Technical data for FM GT12:

Size of hose:	max 550/110 mm
Total length:	7.90 m incl. gun wagon
Shortest length without pull:	5.20 m
Height:	3.85 m
Total width:	2.70 m
Total weight without water:	
with 500m/110 mm:	4,600 kg
Size of wheels:	14/65 x 16"
